

## Special Coilers

### Examples of realization

- Rolling-up of **cables at high speed.**
- Rolling-up with **automatic change of reel.**
- Pulling and rolling-up of a **pharmaceutical product on protective film**
- Pulling and Rolling-up of a **copper coated tube with bending of the tube.**
- Pulling and Rolling-up of **flexible tube (tubular PVC film, PE sheathe , blown film, calendered sheets)**
- **Other** on customer specification

### Coiler for PVC tubular film model TIG500-1

*With pullet and cutter*

*Rolling-up on expensive chuck*

*Reel max diam 500 mm – width 200 mm*

*Applications : rolling-up of cast film and tubular film*

Photo TIG500-1

Photo CY400-2A

### Dual Coilers model CY400-2 A

**Automatic change of reel**

*Length measure and cutter options*

*Ø max reel 400 mm*

> Applications : **Winding of crowns of weak length with frequent change** – winding of silicone tube

### Dual Coilers with peripheral rotation

*With option detection full reels*

*And control of the temperature of the product*

*Ø max reel 600 mm*

> Application : **winding of a pharmaceutical product on protective film**

### Dual Coilers model CY800-2C

**With constant tension** – strong capacity

*Ø max reel 800 mm*

> Application : **winding of copper coated tube with bending of the tube.**
