

Satellis Co-Extruders

Main characteristics

- Single screw extruders
- Diameter **18 to 60 mm**
- Length **20 à 33 D**
- Motor power defined according to material
- Motorised or manual vertical motion
- Single or double thread screw
- Nitrided or bi-metallic barrel
- Extruded material : TP, TPE, bio material...

Laboratory coextruders diameters 18, 20, 25, 30 mm

*Various coextruders diam 18 to 30 mm
With separated or stand on electrical cabinet*

*Coextrusion configuration
diameters 25, 40 and 60 mm*

Coextrusion configuration 2 x diameter 30 mm
