

Vacuum calibration bath

Main Characteristics

- **Length** : 1 m to 4 m
- **Frame** : aluminium or stainless steel welded profiles
- **Support** : spads or castors
- **Adjustment** in 3 directions

Options

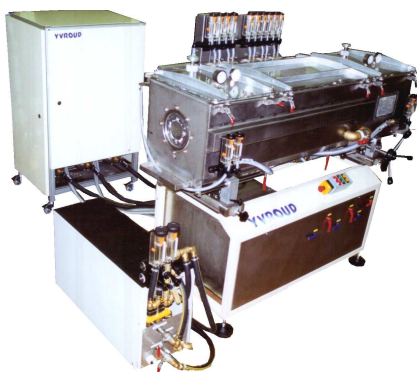

- Working with **closed circuit and water cooling unit**
- **Water temperature regulation.**
- **Spraying removable box** /vacuum immersion
- **Special guides** according to product shape...
- **Motorized motion**
- **Others** according to customer's specifications..

Profil calibration table
model **BCP1000** length 1 m

Calibrating tank 4 m length model **BCV35-40**
For Pipes Ø max 30 mm

2 Chambers calibrating tank model **BCV20-40**
with closed circuit and plates heat exchanger
For Pipes Ø max 200

2 Chambers calibrating tank model **BCV20**
with closed circuit and movable spraying box
For cosmetic pipes Ø max 60

Profil calibration Table model **BCP3000**
Length 3 m – 3 pumps (1x vacuum + 2 x circulation)
