

## Samples of renovated equipments

### Samples

- **Upgrading of complete extrusion lines.**
- **Replacement of mechanical parts** : screws, barrels, motor, protection parts s.o.....
- **Electrical cabinet replacement.**
- **CE machine standardisation** (mechanical and electrical modifications)
- **Integration of overview driving system** for complete extrusion line or individual machine
- **Improvement of extrusion production lines**
- **Others** according to customer specifications

### Haul-off standardisation

- New protection parts*
- New electrical cabinet*
- DC Motor replaced by AC motor*

Renovated Haul-off

3 layers coextrusion line

### Extrusion Line Productivity Enhancement

- *Screw with an improved profil*
- *New 3 layers head*
- *Replacment of the electrical cabinet*
- *Integration of an supervisor system*

> Application : **coextruded pipe for automotive**

### Renovation of a complete extrusion line

- *Extruder and calibration bath*
- *New Haul-off driven by the measuring device*
- *Cutting unit renovated with capacity enhancement*
- *Automated driving of the line*

> Application : **pipe extrusion line for 'on line' seal production**
